

lucite lux® sparkle

A SPARKLING PERFORMANCE

A shower of stars lights up the new LuciteLux® range. The shimmering effect that radiates from this material adds to the mystery of a collection that bears a very appropriate name: LuciteLux® Sparkle. The six muted colors are enhanced by thousands of shimmering, iridescent particles that gleam and shine like the surface of the celestial vault, producing a beauty that has to be seen to be believed, a subtleness that is gradually brought to light. Deep and yet radiant at the same time, the opaque colors of the range come together to form a harmonious collection: Scintillating Red, Flamboyant Brown, Captivating Green, Glittering Blue, Gleaming Violet, Shimmering Black... With a mere wave of a magic wand, LuciteLux® reinvents the appearance of finely polished stone, producing a true-to-life mirror effect offering a wide range of opportunities for unusual interior and exterior applications.
